Vestas Online

Digital self-services to manage your wind energy production

Vestas Online is a digital platform providing wind turbine owners under Vestas service agreement easy access to turbine-specific data and applications, making it easier for them to manage their fleet.

Smart information management

Vestas Online enables users to perform a wide range of basic self-services related to their wind turbines. Data and documents on wind turbines, powerplant and account are safely stored in the cloud and intuitively displayed by the user-friendly platform interface. Obtaining information on your turbines and downloading relevant documents have never been easier. Vestas Online is a secure digital tool where you are always in control of who has access to your power plant data.

Self-services available in Vestas Online

Service Schedule

Manage and receive real time information on upcoming service visits, from initial planning to job completion.

Service Order Reports

View, download and print the service reports automatically generated after completion of service visits.

Workspaces

Easy and intuitive browsing

Organized under different applications and managed through a set of customizable notifications, your wind turbine self-services are always easily accessible. The Vestas Online jump board ensures that the latest and most relevant information updates are just a few clicks away, guaranteeing full overview on your fleet activities status. The platform goes beyond just Vestas and helps customers to manage wind turbines from all the largest brands in the industry.

High integration and accessibility

Information and documents are accessible with one login to Vestas Online, making for a seamless user experience. Integration with the Vestas backend systems and master data ensures data reliability and transparency. Vestas Online is available across several devices and it is available in a variety of languages i.e. English, Chinese, Japanese, German, Spanish.
